

## UE 0203

## Ethylene Vinyl-Acetate Copolymer

## DESCRIPTION

UE-0203 is a low vinyl-acetate content grade, blended with LDPE, presenting good characteristics for the extrusion process. It offers excellent processability, high mechanical resistance, excellent elasticity, puncture resistance and fragility at low temperatures. No additives are present.

## APLICACIONES

Heavy duty bags with high mechanical resistance;  
Agricultural films;  
Blow molding for general purpose;  
Hoses and pipes extrusion.

## CONTROL PROPERTIES

	Resin	ASTM Method	Value	Unit
Melt Index (190°C/2,16Kg)		ASTM D-1238	0,32	g/10min.
Density		ASTM D-1505/2839	0,925	g/cm <sup>3</sup>
Vinyl-Acetate Content		Polietilenos União S	2,5	%

## NOTES

- Values obtained for classification and performance warranty.
- Doubts could be cleared any time directly with our technical assistance and products development team.
- Products tests could be booked in our product development and service center. Call +55 11 4478-4029.
